## Putting Teeth in the Prohibition Law

The most drastic prohibition law  
Kentucky has ever known, perhaps  
the most drastic in force in any  
State in the union is now the law of  
the Commonwealth. The measure  
passed through the legislature with  
little opposition and carries an em-  
ergency clause which puts it into  
effect at once.

Some of the provisions are as fol-  
lows:

For a second conviction of making  
liquor, a penitentiary sentence of  
one to five years. Third offense two  
to ten years.

Any person who buys, sells, pos-  
sesses or transports a still or part of  
a still on second conviction will get  
from one to five years in penitentiary.

First offense \$50 to \$500 fine.

Any building or farm on which a  
still is operated with the knowledge  
of the owner becomes forfeited to  
the State. Similar provision is made  
for the forfeiture of any vehicle,  
boat or aircraft used to transport  
liquor illegally.

After conviction for violation of  
the peace bond is required be-  
fore the prisoner is released. A re-  
ward of \$50 for information leading  
to the conviction of any person for  
the violation of the act is authorized.

No witness will be allowed to re-  
fuse to testify because of the self-  
incrimination, but no testimony given  
by the witness can be used against  
him at any subsequent trial.

No complaint filed by any citizen  
or officer shall be dismissed except  
on the written approval of the Com-  
monwealth's or County Attorney and  
made in open court.

Any officer who fails to enforce  
the provisions of the law shall be  
liable to indictment for malfeasance  
in office and be subject to a fine of  
\$100 to \$1,000 and the office shall be  
declared vacant.

After The Kaiser of Hell Crick  
Robert Duff, Prohibition Officer  
returned last Friday from a raid of  
about ten days in Lee county, he and  
the sheriff of the county captured 10  
tills and four men. Along a pre-  
cious cliff about 50 feet high they  
found a rope dangling from the top  
with a rock tied at the bottom of it.  
Taking this as a clue they climbed  
down the rope to the bottom of the  
cliff. Near where they went down  
they found a large still in operation  
and captured the man operating it.  
Further up the creek the other stills  
were found and three more men ar-  
rested. The men were taken to  
Owingsville before Commissioner  
Blickly who held them on \$500 bond  
each to the Federal grand jury at  
Richmond. The officers had been  
warned not to undertake a raid at  
that point as it was a very danger-  
ous neighborhood. On the creek  
they found a store with a sign in  
gold letters, "The Kaiser of Hell  
Crick." The Kaiser like his proto-  
type had flown the coop but two of  
his sons were arrested. Hell Creek  
is one of the roughest neighborhoods  
in Kentucky and has the right name.  
The stills were not more than a mile  
apart.

Prof. E. M. Coleman, of Cuthbert,  
Ga., who has been instructor of the  
Owingsville Band for the past year  
has been very ill at his head-  
quarters at Winchester for the past  
two weeks. Prof. Coleman has been  
instructor of bands and orchestras  
at Winchester, Nicholasville, Irvine-  
Jackson, Olive Hill and Owingsville  
during his stay in Kentucky. He was  
able to pay the Owingsville band a  
visit Wednesday before going home  
for several weeks. He owns a num-  
ber of lots in Cuthbert, Ga., and  
wants to superintend the erection of  
some residence property before he  
again takes up his musical work in  
Kentucky.

An optimist never worries over a  
bursted bubble. He blows another  
while he waits.

## Summer Schools to Begin in June

The six summer schools to be  
held throughout the State as a re-  
sult of the law passed by the Gen-  
eral Assembly appropriating \$50-  
000 for the purpose, will begin early  
in June according to State Sup't.  
George Colvin. The State will pay  
half of the expense of the schools  
but not to exceed \$500.

Each school will have at least two  
instructors, the maximum salary of  
principal will be \$375 and of assist-  
ant \$225, no class to be less than  
ten students nor more than fifty.

Any county levying the maximum  
school tax will receive \$10 a student  
up to fifty, who attend for the full  
term. Any county levying as much  
as 40 per cent school tax will receive  
\$7.50 a student up to fifty. Any  
county levying as much as 30 per  
cent tax will receive \$5 a student up  
to fifty.

Any student who is more than 16  
years old and has completed the  
grades may attend. Teachers in  
elementary schools are eligible to at-  
tend free of charge, although coun-  
ties not having enough funds may  
charge not to exceed \$10 tuition for  
each student, but the payment must  
be freely made by the student.

The same credits will be given for  
study in the summer schools as is  
given by the normal schools for  
summer courses.

First Week in May Clean-up Week.  
The Governor of the State and  
the State Board of Health name the  
first week in May as Clean-up week.  
They state in their joint proclama-  
tion that reports show that sixty out  
of every hundred cases of sickness  
and forty-three out of every hundred  
deaths in Kentucky are due to pre-  
ventable diseases, many of which  
are the result of conditions brought  
about by the careless disposal of hu-  
man and animal discharges. The ac-  
cumulation of filth and rubbish  
about the home and premises, which  
will afford breeding places for flies,  
mosquitoes, rats and other insects or  
vermin, which will, as soon as the  
warm weather sets in, act as car-  
riers of disease germs are not only  
a menace to health, but are unsightly  
and a reflection on the pride, be-  
sides contributing to the commu-  
nity's fire hazard.

KILL THE RATS BOYS!  
Get ready the traps and dogs and  
see who can bring in the most rat  
tails. For each rat brought to Bob  
Johnson's shop, two cents will be  
paid until the number reaches five  
hundred. Contest open to both white  
and colored and begins Friday of  
this week and continues two weeks.  
Go for the rats boys until not one  
is left to tell the tale. The contest  
is under the auspices of the Wom-  
an's Club and the Chamber of Com-  
merce.

Fitting Up Golf Course  
Some of our local golf enthusiasts  
have fitted up a small golf course on  
the flat adjoining Robert Shield's  
residence. The course is not nearly  
so large as the standard course but  
serves the local enthusiasts well as  
they are most all amateurs at the  
game.

## Easy to operate Easy to clean

De Laval discs, bowl parts and  
tinware have no tubes, crevices,  
holes or corrugated surfaces which  
are hard to clean.

The De Laval discs are washed  
as a single piece and the whole ma-  
chine can be thoroughly cleaned in  
five minutes.

The case with which the De  
Laval can be thoroughly washed  
and kept in a sanitary condition is  
one reason why butter made from  
De Laval cream scores highest at  
the National Dairy Show.

Practically all  
the creameries in  
the country use De  
Laval Power Cream  
Separators.

"I suggest," said Dugald, "that our numbers having been fortunately diminished and there being on the basis of Peter's calculations, enough to enrich us all, we should share and share alike." And this proposal was received with acclamations, as was a second from the same source, providing a certain percentage of each share to Cooke, to whom the news of his good fortune was to come later as a great surprise.

Shortly before sundown Cuthbert and Cooke were dispatched by Dugald Shaw to the cliff above the cave with supplies for the injured pirates. These were let down by rope. A note was brought up on the rope, signed by Mr. Tubbs, and containing strangely jumbled exhortations, prayers and threats. A second message of the same nature was delivered, neatly folded and addressed in the same hand to Miss Jane Harding. Cuthbert gave this privately to me, but its contents must forever be unknown, for it went, unread, into Cooke's pocket. I had no mind to find Aunt Jane with her umbrella as a parachute, vanishing over the cliffs to seek the arms of a repentant Tubbs.

The fly in the ointment of our satisfaction, and the one remaining obstacle to our possession of the treasure, was the presence of the two pirates. In our midst. They were quite the least choice of the collection. Chris, when he was not swearing, wept moelily, and so touched the heart of Aunt Jane that she lived in fear of her letting him go if she got the opportunity.

What to do with the pirates continued for a day and a night a knotty problem.

It was Cuthbert Vane who solved it, and with the simplicity of genius.

"Why not send 'em down to their chums the way we do the rats?" he asked.

Dire entreaties greeted the decision. Aunt Jane wept, and Chris wept. Oaths from Captain Magnus in a turgid stream. Nevertheless the twin were led away, firmly bound, and guarded by Dugald, Cuthbert and the negro. And the remarkable program proposed by Cuthbert Vane was triumphantly carried out. Six prisoners now occupied the old cave of the buccaners.

With the camp freed from the presence of the pirates all need of watchfulness was over. The prisoners in the cave were provided with no implements but spears, whereas dynamite and crowbars would be necessary to force a way through the debris which choked the mouth of the tunnel. A looking over of the ground at the day feeding time would be enough.

Tomorrow's sun would see our hopes crowned and all our toil rewarded by the recovery of the treasure from the Island Queen.

The exorbitant prices that prevail all over the world led Col. Charles L. Forbes, director of the Veterans' Bureau, to say at a reception in Washington:

"These unreasonable prices naturally made men think that post-war morality in the business world was more rapacious than pre-war morality was. It used to be that a man was content to hold his own. Today he insists on holding other people's."

## MOTHER! OPEN CHILD'S BOWELS WITH CALIFORNIA FIG SYRUP

Your little one will love the "fruity" taste of "California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. A teaspoonful never fails to cleanse the liver and bowels. In a few hours you can see for yourself how thoroughly it works all the bowels and undigested food out of the bowels and you have a well, playful child again.

Millions of mothers keep "California Fig Syrup" handy. They know a teaspoonful today saves a sick child tomorrow. Ask your druggist for genuine "California Fig Syrup," which has directions for babies and children of all ages printed on bottle. Mother! You must say "California" or you may get an imitation fig syrup. Advertisement.

Bobby was ailing, and the doctor left medicine most bitter.

**COMPANION TO THE GOODYEAR ALL-WEATHER TREAD**

In a factory devoted exclusively to manufacturing Goodyear Tires for small cars, the two tires illustrated above are made.

One is the famous 30x3 1/2 Goodyear All-Weather Tread Clincher.

By long wear, superior traction, freedom from skidding, and ultimate economy, the Goodyear All-Weather Tread has won unquestioned leadership.

As a companion to this tire there is the Goodyear 30 x 3 1/2 Cross Rib.

Built of the same high grade Egyptian fabric and with a long wearing but differently designed tread, this tire offers unusual value.

Over 5,000,000 of these tires have been sold in the last five years.

Their quality and serviceability have proved to thousands of motorists the folly of buying unknown and unguaranteed tires of lower price.

Ask your Goodyear Service Station Dealer to explain their advantages.

**CHAPTER XIX.**

**"Twixt Cup and Lip."**

Next morning an event occurred sufficiently astonishing to divert our thoughts from even the all-important topic of the Island Queen. Cooke, who had been on the high land of the point gathering firewood, came rushing back to announce that a steamer had appeared in the offing. All the party dropped their occupations and ran to look. That the Rufus Smith had returned at an unexpectedly early date was of course the natural explanation of the appearance of a vessel in these lonely seas. But through the glass the new arrival turned out to be not the tubby freighter, but a stranger of clean-cut, rakish build, lying low in the water and designed for speed rather than carrying capacity.

A mile offshore she lay to, and a boat left her side. Wondering and disquieted, we returned to the beach to await her coming. Was it another pirate? What possible reason could bring a steamer to this remote, unvisited, all but forgotten little island?

"As the oarsmen drove the boat upon the beach the man in the stern sprang ashore. Dugald Shaw stepped forward, and the stranger approached, doffing his helmet courteously.

"You are the American and English party who landed here some weeks ago from the Rufus Smith?"

His English was easy and correct, though spoken with a pronounced Spanish accent. His dark high-featured face was the face of a Spaniard. And his grace was the grace of a Spaniard, as he bowed sweepingly and handed Mr. Shaw a card.

"Senor Don Enrique Gonzales," said Dugald, bowing in his stiff-necked fashion, "I am happy to see you. But as you represent his excellency the president of the republic of Santa Marina I suppose you come on business, Senor Gonzales?"

"Precisely. I am enchanted that you approach the fact without the tiresomeness of explanations. For business is a cold, usually a disagreeable affair, is it not so? That being the case, let us get it over."

"First do us the honor to be seated, Senor Gonzales."

Comfortably bestowed in a camp-chair in the shade, the Spaniard resumed:

"My friend, this island belongs, as of course you are aware, to the republic, of which I have the honor to be a citizen. All rights and privileges, such as harvesting the copra crop, are strictly conserved by the republic. All persons desiring such are required to negotiate with the minister of state of the republic. And how much more,

and that we had certainly expected to leave the island with it in our possession."

The dark indolent eyes of our visitor grew suddenly keen. Half veiled by the heavy lashes, they searched the face of Dugald Shaw. It seemed that what they found in that bold and open countenance satisfied them. His own face cleared again.

"I think we speak at cross-purposes, Mr. Shaw," he said courteously, "and that we may better understand each other, I am going to tell you a little story. At about this season, two years ago, the navy of Santa Marina, the same which now lies off the island, was making a voyage of inspection along the coast of the republic. It was decided that the excellency I accompanied La Golondrina. On our arrival at Leeward I came ashore in the boat, and found to my surprise a small sloop at anchor in the cove. About the clearing were the signs of recent visitation, yet I knew that the old German who had had the copra concession here had been gone for some time. No one responded to our shouts and calls.

"I turned my attention to the sloop. In the cabin, besides a few chests, I found something that interested me very much—a large brass-bound chest, of an antique type such as is common enough in my own country.

"Of course I had heard of the many legends of treasure buried on Leeward island. Consequently I was somewhat

prepared to find in the chest, what in fact I did find there, over a million dollars in old Spanish coins.

"These coins, which were packed in strong canvas bags, were, as you may fancy, very quickly transferred to the cutter. We did not trouble ourselves with the unwieldy chest, and it remains, I suppose, in the cabin of the sloop, which I observed as we crossed the cove to have been washed up upon the rocks."

"This is a very interesting story, Senor Gonzales," said Dugald Shaw, quietly, "and as you say, your visit here deprives us of nothing, but merely saves us further unprofitable labor. We are grateful to you."

The Spaniard bowed.

"You do me too much honor. But, as you remark, the story is interesting. It has also the element of mystery. For there remains the question of what became of the owner of the sloop. His final preparations for leaving the island had evidently been made. I then pursued the provisions for the voyage brought on board the sloop—and then he had vanished. What had befallen him? Did the gold carry with it some deadly influence? One plays, as it were, with this idea, imagining the sloop and his history of these old doubloons. How, in the first place, had he found them? Through chance—or by following some authentic clue? And then, in the moment of success, he disappears—poor fellow! And Senor Gonzales, he ran up on Police, blowing him airily from the tips of his fingers.

"However, we have the treasure—the main point, is it not? But I have often wondered—

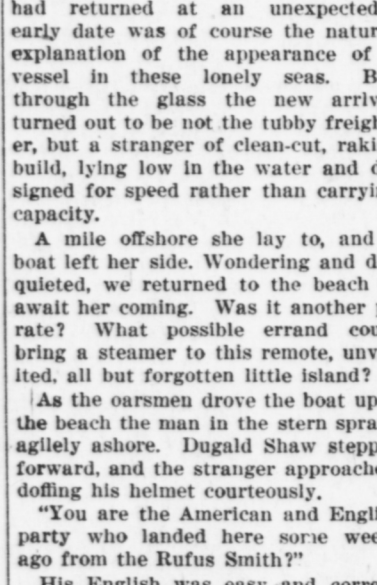

"If you would like to hear the rest of the story," said Mr. Shaw, "we are in a position to enlighten you. That we are so, is due entirely to this young lady, Miss Virginia Harding."

The Spaniard rose and made obeisance profoundly. He resumed his seat, prepared to listen to the long government official, but the cordial and interested guest and friend.

The story, of course, was a long one. Everybody took a hand in the telling, even Cooke, who was summoned to his retirement in the kitchen. I then found the Spaniard as a successful strategist. The Journal of Peter was produced, and the bags of doubloons handed over to the representative of the little republic. I even offered to resign the silver shoe-locks which I had found in the secret locker on the Island Queen, but this excess of honesty received its due reward.

"The doubloons being now in the possession of the Santa Marina nation, I beg that you will consider as you own the Island Queen and all it may contain," said Don Enrique to me with as magnificent an air as though the sand-filled hulk of a wrecked sloop were really a choice gift of heaven to a young woman.

me, where certain inquiries were satisfactorily answered. There were those at that port who had made a shrewd guess at the destination of the party which had shipped on the Rufus Smith. I then pursued the course to Leeward. But admit, my friends, that I have not by my arrival, caused you any material loss. Except that I have unfortunately been compelled to present you to yourselves in the character of—as says the young lady—pirates—madam, I speak under correction—I have done you no injury, eh? And that for the simple reason that you have not discovered what you sought, hence cannot be required to surrender."

We looked at one another doubtfully. The ambiguous words of the Spaniard, the something humorous and mocking which lay behind his courtly manner, put us quite in the dark.

"Senor Gonzales," replied the Scotchman, after a moment's hesitation, "it is true that so far only a negligible amount of what we came to find has rewarded us. But I cannot in honesty conceal from you that we know where to look for the rest of it."

## Men Girls Love

Steady men—well, they are the princes of the matrimonial marketplace. Steadiness means stamina and dependability, and it is about the most precious streak a girl can expect to find in a man. A chap who is 100 per cent steady will streak a brighter flash across the eyes of any maiden's flesh than his rival who may be three whiter and sexier. Girls' friends upon the steady fellows.

Unfortunately he could never swear by the whiskers of an American, because he has none.—Exchange.

## For Market Shifts to China.

Because of the disturbed conditions  
in Russia, Leipzig has been deprived  
of its place as the fur center of the  
world, which has now been shifted to  
Mukden, China. Many American firms  
have representatives located there.  
Prior to 1915 practically no shipments  
of furs were made from Mukden,  
whereas the value of such shipments  
now amounts to \$2,500,000 annually.

## MAGNIFICENT WORK OF ART

Papal Tiara, With Its Wealth of Jew-  
els, is by Far the Most Costly  
Earthly Crown.

The papal tiara worn by Pius XI is a magnificent sample of the goldsmith's and jeweler's work. It is formed on a basis of very fine felt covered with a kind of silver mesh on which there are three crowns. Each of these consists of a good band of extremely light construction, set with jewels and edged with two rows of pearls. There are 90 pearls in each row, making 180 pearls in all.

The first crown is, in addition to the pearls, adorned in the order given with 16 rubies, three emeralds, a hyacinth, an aquamarine, three rubies, a sapphire and eight gold points with five garnets and two Balas rubies. The second crown has ten emeralds, eight Balas rubies, one chrysolite, two aquamarines, six small rubies and three sapphires.

In the third are 16 small Balas rubies, three larger Balas rubies, four sapphires, three hyacinths, three aquamarines, one garnet, eight gold floral ornaments each with two emeralds, one Balas ruby, a chrysolite and eight gold points, each adorned with a garnet.

The top of the tiara is covered with a layer of thin gold, in which there are set eight rubies and eight emeralds. This gold covering is surmounted by a golden globe enameled in blue, on top of which is a cross composed of eleven brilliants. Finally the finials of the tiara, which bear the arms of the new pontiff, are adorned with topazes, emeralds and other jewels.

Altogether, without reckoning the six rows of valuable pearls, there are 146 jewels of various colors and eleven brilliants.

**Engineering Triumph.**  
The costliest theater in the world is nearing completion, says the Mentor Magazine. It is the National theater of Mexico at Mexico City, which will cost approximately \$20,000,000. This huge structure presented its builders with an engineering puzzle that the whole City of Mexico is on the site of an ancient lake. Usually foundations are omitted from Mexican buildings and their place taken by a thin layer of concrete and steel, which extends for a considerable distance around the building. Regular foundations were laid for the theater, re-inforced with girders. They started to disappear before the superstructure was erected. This has now been remedied.

**Over-Indulgence in Sugar.**  
We eat too much sugar, and we usually take it in too concentrated form, says George E. Corbitt, writing on "Use and Abuse of Sugar" in Life and Health (Washington). If we should eat sugar in no more concentrated form than that in which it grows, we should not eat enough to do us any harm, thinks Mr. Corbitt, according to the Literary Digest. But in the concentrated form of candy, confectionery, sirups and foods sweetened with granulated sugar, its taste is so much enjoyed and it is so nutritious, that it is very easy to eat enough to be detrimental to the health, or rather, it is very hard not to do so.

**Secret of Terror.**  
A physician tells the New York Times a story to illustrate the fear of disease. A great novelist once went to consult a famous heart specialist about a pain which was causing him doctor talk occasion to read one of his stories which dealt with terror of a child in the dark night. The doctor asked the novelist this question: "Why did you omit to describe what was the child's fear?" "Ah," said the other, "that is my craft. The child did not know what it saw. I would not have the reader know, either. The secret of terror is mystery."

**Curbing of Profiteers Legal**  
Washington.—The New York State rent law of 1920 was held to be valid by the Supreme Court. The Court, in its decision, which was delivered by Associate Justice John H. Clarke, held that the emergency declared in the act existed at the time the law was passed and that the act was a proper exercise of the police power of the state for the general welfare. Associate Justices Joseph McKenna, Willis Van Devanter and James C. McReynolds dissented.

**Regularity is Important.**  
Regularity in feeding, watering, milking and general care of the cows is important during the winter feeding period.

**Protection for Calves.**  
Calves must be protected from cold drafts and dampness, be supplied with fresh air and permitted exercise.

**Skim Milk for Poultry.**  
Skim milk is thin-looking stuff, but it may be put to good use in the poultry yard.

## NOW DO MY WORK WITH EASE

Because Lydia E. Pinkham's  
Vegetable Compound Re-  
stored My Health

Hornell, N. Y.—"I was in bad health but there didn't seem to be any one thing the matter with me.

I was tired out all over and it was an effort for me to move. I was irritable and could not sleep nights and had trouble with my bowels and at my periods. It seemed that nearly every one around me knew of your medicine and wanted me to try it. So at last I took Lydia E. Pinkham's Vegetable Compound Tablets and Lydia E. Pinkham's Blood Medicine and improved every day. I do all my own work now except the washing and do it with ease. I can accomplish as much in a day now as it would have taken me a week to do last winter and I try to get every one I know to take your medicine to build them up. You are welcome to use this letter as a testimonial if you like."—Mrs. CHAS. BAKER, 21 Spencer Ave., Hornell, N.Y.

In almost every neighborhood there are women who know of the value of Lydia E. Pinkham's Vegetable Compound. They know because they have taken it and have been helped. Why don't you give it a trial?

**Pressure of Necessity.**  
During my college days I went out one evening with a young man friend and discovered upon my return that I had forgotten my house key. Not liking to arouse the sleeping household, we investigated the windows and found one which would open.

I had just climbed inside when I heard a man's voice call out: "Who's that?"

"It's just Lulu," I answered, reassuringly. "Well, who in thunder's Lulu?"

I had got into the house next door.—Exchange.

## OPERATORS DEFEND STRIKE POSITION

UNIONS CHARGED WITH AT-  
TEMPTING TO SET UP  
"SMOKE SCREEN"

Negotiations Are Favored By Daugherty—Old Time Familiar Tactics Upon The Part of Unions, Is Assertion of Spokesman For The Operators.

Washington.—Defense of the bituminous coal operators' position in refusing to negotiate a central agreement with the miners' union was given by T. H. Wadsworth, spokesman for Pennsylvania producers, before the House Labor Committee in its investigation of the coal strike, and at the same time an intimation was given by Attorney-General Harry M. Daugherty, through a letter from him which was read into the record, that the miners would face prosecution under anti-trust laws if they again saw fit to fix national wages in the industry by such an agreement.

Other developments included a statement by Secretary Herbert C. Hoover, upon his return from the West, that the miners' union, presumably from nonunion fields, showed that bituminous coal mined Monday after the strike had been called amounted to 572,000 tons and Tuesday to 542,000 tons. Mr. Hoover declared, however, that the time was insufficient to justify any deduction from the production figures in their possible bearing upon the question of sufficiency of supply.

John I. Nolan, chairman of the House Labor Committee, also made public telegraphic messages from representative operators in the central district, which, he said, "were not entirely hopeless" in their refusal to accede to the committee's request to meet interstate negotiations with the union. "They did indicate," he stated, "a spirit of willingness to meet the men in their own districts."

Mr. Watkins, in appearing before the House committee, attacked the union Mine Workers of America as "setting up a smoke screen, familiar union tactics," in charging operators with breach of contract. The union itself, he said, "was breaking the contract, because it refused to meet with mine operators in the proper conference of the country outside of Ohio, Illinois, Indiana and Western Pennsylvania to fix scales."

## OLIVIA STONE IS ACQUITTED

Of Murder—Crowd Greets Verdict With Yells And Cheers

New York.—"Not guilty." The aged verdict for women on trial for their lives echoed through the Supreme Court in Brooklyn where for nine days Olivia M. P. Stone, of Cincinnati, nurse, has sat in torture and anxiety to the charge that she murdered Ellis Guy Kinkead, former Corporation Counsel of Cincinnati, in Brooklyn last August.

The jury came in at 9:25 p. m. after ten hours of deliberation. Charles C. Van Brunt, foreman, announced the verdict.

With a cry that rang through the room, a "thank God" torn from her lips, hands that sob into the air, lips that kissed the broad back of Edward Kelly, her counsel, Miss Stone rejoiced that she was free.

The verdict was greeted with a shout of approval and a cheer from the crowd in the lobby awaiting the verdict.

**Blast Wrecks Church**  
Kankakee, Ill.—An explosion of dynamite, which wrecked the new Latter Day Saints' Church at Rockville, was investigated by Sheriff W. J. Riley. The church was the second to be destroyed in the series of explosions. The explosion was ascribed to persons opposing them. The first church was burned October 20, 1920. The second was destroyed, shortly before it was opened, by persons who snatched the walls with tar and broke the furniture, last December. An attempt was made to burn the structure.

**Harding Urged To Act**  
Washington.—President Harding is asked in a resolution introduced in the House by Representative Tom Connolly, of Texas, Democrat, to "take appropriate steps to adjust the diplomatic relations between the United States and the Republic of Mexico, that official relations may be restored and amicable and cordial relations may be maintained between the citizens of Mexico and the United States."

**Tax Returns Decline**  
New York.—Income tax collections in the New York District for the first quarter of 1922 reached \$86,984,658.87, a decline of 35.3 per cent from the amount received during the corresponding period of 1921, Collector Bowers announced.

**Fortune Dwindles**  
Chicago.—First estimates of \$200,000 as the value of the estate left by Rosa and Josefa Blazek, the Siamese twins, declined to \$84,800 in American money and a farm of doubtful value in Czechoslovakia. What has become of the remainder of their fortune, accumulated during their 35 years of exhibitions in the leading amusement resorts of Europe and this country, remains a mystery. Their earnings, respectively, before the World War, averaged \$12,000 a year, exclusive of their living expenses.

**Kills Wife; Fights Poss**  
Carmel, Ill.—Angered because she sought to protect stock which had strayed into his farmyard, Aaron White shot and killed his wife at Springfield, Ill., north of this city. White then barricaded himself within his house, declaring he would kill any one who attempted to arrest him. The house was surrounded by a posse of 50 men and in the battle which then followed White, who is 70 years old, was wounded. The house was rushed and White arrested.

**Radiophones for Pilots.**  
Steamships entering the port of San Francisco no longer will be held up in foggy weather for the pilot boats to come alongside with a pilot. The pilot boats which put out from the Golden Gate have now been equipped with wireless telephones.

As soon as a steamer arrives off the headlands a wireless message is sent for a pilot. The message is relayed from shore by radio-telephony to one of the pilot sloops and the latter immediately puts off with a pilot for the incoming ship.

## OLD BOAT NOW POWER PLANT

Former Mississippi River Steamer Seems to Have by No Means Outlived Its Usefulness.

One of the survivors of the days made famous by Mark Twain's "Life on the Mississippi," the steamboat Andrew Padlock, is now serving as a power plant at New Orleans. Perched high in the air on stilts, smoke still belches forth in black masses from its tall stacks, but the stern wheel that once churned the murky waters of the river is motionless.

The captain and crew of the "Andy," as it was affectionately termed by the negro roustabouts, were transferred to other boats, and the crew now consists of two firemen, each of whom is addressed jauntily as "captain." The numerous puffing cart invariably blow their sirens in salute, and old "Andy" always replies vigorously from its position just beyond the water's edge.

## MIGHT SEEM SO DADDY

"Full House" Likely to Be the Least That Father of Quintet Would Remark.

A social worker attending the convention of the Indianapolis of the Indianapolis tuberculosis association told this story.

A Sunday school teacher had been asked by one of her pupils what was used in referring to two children born at the same time.

"Twins," the teacher answered.

"What is the term used in referring to three babies born at the same time?" was the next inquiry.

"They are triplets," she replied.

"How do you refer to four babies?" another asked.

"Four babies are called quadruplets."

A bright, flaxen-haired youth, probably thinking to catch the teacher, asked the term for five children.

Before the teacher had time to respond, a red-headed little fellow, the Peck's bad boy of the class, answered: "Gee, that's a full house."—Indianapolis News.

"That's Jinks, the famous millionaire, over there on the left. He's a wife-mad man."

"But I understand that his money came from oil on his farm."

**As a Friend.**  
"Is Flubdub a free thinker?"

"No, he's married."—Louisville Courier-Journal.

A pained opportunity seldom is redeemed.

That's the way a good many people have found it to be with the comfort and cheer they thought they had secured in tea and coffee. When they came to depend on it—there was a hidden string, and nothing left but disappointment.
